National Seminar on

Trade Law and Technology:

Navigating Legal and Economic Frontiers in the Digital Era Issues and Challenges

(10 – 11 September, 2026 – Hybrid Mode)

Organized by

K.V. Ranga Reddy Law College
Hyderabad

About the Society:

Andhra Vidyalaya Education Society, formerly known as Andhra Vidyalaya is one of the oldest and pioneer educational societies of Telangana State having been established in 1944.

The founders of the Society were all visionaries and freedom fighters like Raja Bahadur Venkata Rama Reddy, Suravaram Pratap Reddy, Konda Venkata Ranga Reddy, Madapati Hanumantha Rao, N.K.Rao and several others. Reflecting the aspirations of people, the society established first Telugu medium school when the medium of instruction was Urdu in the erstwhile Hyderabad State.

Over the years, the society has expanded its activities and presently runs two high schools, a Degree and Post Graduate colleges besides a Law College.

About the College:

The K. V. Ranga Reddy Law College was established in 1991, named after Sri K.V.Ranga Reddy, a freedom fighter who was a lawyer by profession and a former Deputy Chief Minister of United Andhra Pradesh. The establishment of Law College owes to the farsightedness of Justice Konda Madhava Reddy, former Chief Justice of AP and Maharashtra states and founder Chairman of Central Administrative Tribunal.

The college offers LL.B(3 Years), BA.LL.B(5 years) and LL.M courses with student strength of 920 and well qualified and experienced academic team. The college is centrally located in the heart of the city. Easy accessibility and well connectivity makes the college a natural choice for legal studies. The college is blessed with a spacious, serene campus conducive for academic pursuit.

About the Seminar:

The global economy is being reshaped by technological innovation, digital commerce, and

complex cross-border trade dynamics. Emerging technologies, data-driven platforms, and digital infrastructures are redefining markets, contracts, and international legal norms. Simultaneously, geopolitical war and trade tensions, cyber security challenges, and digital protectionism create uncertainty in global trade.

This seminar provides a platform to explore how international trade law, economic policies, and legal frameworks can adapt to technological disruptions, fostering resilient, inclusive, and compliant governance in the digital era.

Seminar Objectives:

- To foster dialogue on the intersection of technology, law, and economic governance
- To explore strategies for regulatory adaptation and harmonization in response to global technological disruptions
- To encourage interdisciplinary research combining law, economics, and technology
- To develop practical policy recommendations for resilient, ethical and inclusive digital trade framework

Themes and Sub-Themes

Theme1: International Trade, Technology, and Global Governance

Sub-Themes:

- WTO and digital trade negotiations: modernizing multilateral rules
- International economic laws in e-commerce, cross-border payments, and digital currencies
- Managing cross-border data flows, supply chains, and trade compliance
- Regulatory challenges posed by emerging technologies: AI, block chain, Internet of Things etc.
- Addressing digital protectionism, trade disputes, and dispute resolution mechanisms
- Role of international organizations (WTO, UNCITRAL, IMF) in regulating digital trade

Theme2: E-Commerce, Digital Platforms, and Legal Jurisdiction

Sub-Themes:

- Legal recognition and enforceability of online and smart contracts

- Jurisdictional and territorial challenges in digital commerce
- Consumer protection, data privacy, and compliance in e-commerce
- Platform liability, Competition law, and governance of digital marketplaces
- Mechanisms for Online Dispute Resolution (ODR) and international commercial arbitration
- Policy reforms and cross-border legal harmonization in digital commerce

Theme3: Artificial Intelligence, Data Governance, and Trade Compliance

Sub-Themes:

- Data governance, sovereignty, and trade law implications
- Ethical and legal accountability of AI in trade decision-making
- Transparency, algorithmic bias, and liability in digital trade
- Comparative regulatory perspectives: EU, US, India, and Global South
- Balancing innovation with privacy, fairness, and trade compliance.

Theme4: Digital Sovereignty, Cyber security, and Economic Security

Sub-Themes:

- Cyber security governance in global supply chains and trade networks
- Legal accountability in cyber crimes, cyber espionage, and economic warfare
- Data localization, digital protectionism, and cross-border trade policy
- Economic security, technological dependence, and regulatory safeguards
- Institutional reforms and multilateral frameworks for digital trade security.
